

# Marvels of the **SAMSUNG Galaxy Note5** 4G+

Powered by the latest 64-bit Octa Core Processor with 4GB RAM, complemented by the unrivalled S Pen, and matched with a stunning 5.7-inch Quad HD SUPER AMOLED display. The Samsung Galaxy Note 5 4G+ offers unparalleled performance, amazing photo and video quality, and an immersive viewing experience.

Here are 9 ways to take advantage of the technological marvel.

Quick Notes with Screen Off Memo

## 1 Quick Notes with Screen Off Memo

Eject the S Pen while the phone is on standby mode. And you can immediately write on the screen and save the note, even when the screen is off. Perfect for quick memos or taking down complicated coffee orders from colleagues.

## 2 Customised Air Command for Every User

Get to your favourite app faster than before. Add up to three commonly used apps on the Enhanced Air Command menu, alongside Action Memo, Smart Select and Screen Write, to access those apps instantly once the S Pen is removed.

## 3 Capture and Share Long Screen Shots Easily

Tired of scrolling through webpages just to screen capture each portion? Now you can share long chat conversations or news articles easily with Scroll Capture. Multiple screenshots are stitched together in a coherent flow where you can highlight relevant areas and make notes directly on the captured image.

## 4 E-Shopping and Research Done with Ease

The best part of e-shopping is surfing through different online retailers for amazing deals. The Galaxy Note 5 4G+ makes it even more convenient. Use Smart Select to collect the screenshots and save them to the Scrapbook app. The images along with their respective URLs will now be saved at one handy location, so you can refer to the websites later.

## 5 Edit PDF Documents On The Go

Gone are the days where you need to print and fax forms just to apply for a new credit card. Fill up the PDF document, sign it with your S Pen, and send it right off from your Galaxy Note 5 4G+. Quick and fuss-free.

## 6 Fun Memories with Video Collage

Why send a long video of a birthday celebration when you can collect up to four exciting activities in one amazing collage? With Video Collage, the birthday song, the blowing out of candles, the cake cutting, and the merriment can be crafted into one special collage, complete with a soundtrack of your choice.

## 7 Live Broadcast Important Moments via YouTube™

Don't just talk about your kid's piano recital. Share it LIVE as it happens. Live Broadcast on the Galaxy Note 5 4G+ lets you stream the performance directly from your phone onto your own YouTube™ account. So family and friends can be part of the special moment, even if they can't make it for the show.

## 8 Juice Up Your Galaxy Note 5 4G+ in a Jiffy

You can now power up your Galaxy Note 5 4G+ to full charge in just 90 minutes<sup>1</sup> with the bundled Adaptive Fast Charger. For greater convenience, lose the cord and power up the Galaxy Note 5 4G+ with the new Fast Wireless Charging Pad<sup>2</sup>, which can do the job in just 120 minutes<sup>3</sup>.

## 9 Share Content Across Multiple Devices Easily

With SideSync 4.0, you can now conveniently share content between your computer, tablet and your Galaxy Note 5 4G+. Once the devices are connected via SideSync 4.0, you can also respond to WhatsApp chat messages or pick up phone calls directly from your PC or Samsung tablet, without reaching for your phone.
