

Server Foundation Sessions

Session Title	Session Abstract	Speaker's Name / Title
SvF Open Discussion Forum	This is your session. All participants can suggest topics for an open discussion between participants. This session will be moderated by SvF product management leaders and attended by product managers, technical product managers and engineers.	Jason Nadeau - Group Product Manager SvF
Practical Uses of Configuration Management	We will discuss how VCM is used today and get feedback from customers on how they see VCM will be used in the future.	Michael Byerly - Director, Product Management
Symantec's HA/DR Solutions	Mission-critical applications with stringent RPO/RTO requirements require the full-service high availability and disaster recovery (HA/DR) solutions offered by VCS. In this session we will discuss how customers are deploying HA/DR solutions with VCS, the current VCS roadmap for HA/DR support, as well as gather future VCS requirements relative to HA/DR.	Hugh Shannon - Group Product Manager
VCS in a VMware ESX Environment	Server virtualization is a hot trend in IT, and VMware is leading the charge on x86 architectures. In this session we will explore how Veritas Cluster Server delivers full-service HA/DR for ESX environments and how this architecture differs from traditional VCS. We will discuss best-practices for deployment, and also gather ESX-specific requirements and feedback from attendees.	Jason Nadeau - Group Product Manager SvF
Symantec High Availability & Disaster Recovery Solutions for SAP	Many organizations rely on SAP NetWeaver as the platform for execution of business processes. In this session we will discuss how customers are deploying SAP with VCS, the current VCS roadmap for SAP support, as well as gather future VCS requirements relative to SAP.	Manuel Braun - Sr Technical Product Manager, ISV Solutions

Centralised Management with VCS	Veritas Cluster Server Management Console delivers single-pane-of-glass visibility, operational control, and reporting across the entire multi-platform HA/DR environment. In this session we will discuss how customers are using VCS MC, the current roadmap, as well as gather future requirements.	Jason Nadeau - Group Product Manager SvF
