

Setting permissions for Smart Card Service

Step 1

Open the Services MMC snap-in by launching "Start/Settings/Control Panel/Performance and Maintenance/Administrative Tools/Services".

Set "smart card" service to logon using LOCAL SERVICE as a user account without password:

- Double-click on Smart Card in the list of Services
- Choose the "Log On" tab
- Select "This account"
- Click on "Browse": it opens a new windows named "Select user"
- Type "local" into the third field of the windows (the white one), and click OK.
- Click on "Apply" and "OK".

Step 2

Run **Regedit.exe** by typing it in Start> Run.

Step 3

Go to the following key:

HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\Cryptography\Calais

Step 4

Check the permissions for LOCAL SERVICE. Make it "Full Control":

- Right-click on the key (Calais) and select "Permissions..." from the pop-up menu
- Click on LOCAL SERVICE to select it
- Allow the "Full Control"
