1 General

This Release Notice is a summary of the major extensions dependencies and operating information with respect to TIAM V13.1C under the BS2000/OSD *) operating system.

The release level is that of May 2009.

Customers will receive an updated version of this file should any subsequent changes be made. The changes are numbered in the margin.

To print this file, use
/PRINT-DOCUMENT FROM-FILE=SYSFGM.TIAM.132.E,-
/ DOC-FORM=*TEXT(LINE-SPACING=*BY-EBCDIC-CONTROL)
(English version).

All BS2000 product Release Notices are also available at

<http://manuals.ts.fujitsu.com/>

If one or more previous versions are skipped when this product version is used, the information from the Release Notices (and README files) of the previous versions must also be noted.

1.1 Ordering

TIAM V13.2A can be ordered from your local distributors.

TIAM V13.2A is subject to the general terms and conditions of the software product use and service agreement.

1.2 Delivery

The files for TIAM V13.2A are distributed through the SOLIS system.

The current file and volume characteristics are listed in the SOLIS2 delivery cover letter.

*) BS2000/OSD (R) is a registered trademark of Fujitsu Technology Solutions

1.3 Documentation

The following documentation is available for TIAM V13.2A:

Title	!	Order no.
TIAM V11.2A Benutzerhandbuch	! ! !	U988-J-Z135-8
TIAM V11.2A User Guide	! !	U988-J-Z135-8-7600

A readme file describing extensions valid for TIAM version 13.2A is also available. There is no modification at the user interface level in TIAM V13.2A.

The documentation of the BS2000 standard configuration is also necessary for the use of TIAM. In addition, it is advisable to consult the documentation of VTSU-B product.

The BS2000/OSD documentation is also available in German and English on CD-ROM with the title BS2000/OSD SoftBooks.

The documentation is available in the form of online manuals under <http://manuals.ts.fujitsu.com> or can be ordered in printed form at extra cost under <http://manualshop.ts.fujitsu.com>.

The product Adobe Reader is required to read or print the manuals in PDF format.

These manuals may be supplemented with README files. These contain changes and extensions to the manual of the product concerned. The file names are made up as follows:

SYSRME.<product>.<version>.E (file with English text)

When printing the files, you should specify the CONTR-CHAR=EBCDIC operand in the PRINT FILE command.

2 Software extensions

Only expansions and improvements distinguishing this version from the versions TIAM V12.0A are described below.

1. New command SHOW-TERMINAL-ATTRIBUTES

Display terminal properties.
This command is an extension of the SHOW-TERMINAL-OPTIONS.

2. New value UTFE for the command MODIFY-TERMINAL-OPTIONS

Support of Unicode in combination with a corresponding terminal emulation like MT9750 V7.0

3 Technical information

3.1 Ressource requirements

TIAM V13.2A is executable on systems having a main memory configuration of 0.5 MB or more.

At runtime, the following memory areas are required in the system and user address spaces:

system address space : 20K + 2K for each dialog task created
user address space : 40K

3.2 Software configuration

For TIAM V13.2A BS2000/OSD-BC V6.0B and higher and openNet Server V3.3A are required.

When using Unicode BS2000/OSD-BC 6.0B with KP II/2006 and higher and openNet Server V3.3A are required.

3.3 Product installation

The installation of the product with the installation monitor IMON is mandatory.

The information concerning installation in the delivery cover letter and in the product documentation must be followed.

The necessary inputs and the sequence of the installation are described in the IMON documentation.

3.4 Product use

All migration activities for TIAM V13.2A are described in the README file.

3.5 Discontinued functions (and functions to be discontinued)

None.

3.6 Incompatibilities

TIAM V13.2A is fully compatible with the preceding TIAM version.

3.7 Restrictions

None

3.8 Procedure in the event of errors

If an error occurs, the following error information is required for diagnosis:

- BS2000 / TIAM version(s) from the system you work on.
- Environment in which you work: VTSU-B, OMNIS, BCAM versions.

- SLED, system dump of the affected task.
- Console log or CONSLOG file
- For reproducible errors, exact description of error conditions.

4 Hardware support

TIAM V13.2A runs on all CPUs that are supported by BS2000/OSD-BC as of V6.0A.
