5 Tenets
of Modern Marketing

Engagement

Your customers demand and deserve value-based interactions across all points of engagement. More importantly, timing and relevance are critical factors to ensure that you're providing multichannel always-on interactions that support your consumer's path to purchase. Customer obsession is the driving force of meaningful, personalized engagement where you truly know your customer.

To engage with prospects and customers in a significant way, you have to be where your customers are. How do you do that? By establishing your target audience's preferred channels.

The Modern Marketing era is driven by the self-educated consumer who marketers must engage to achieve a relevant, targeted, and value-based customer experience.

Effective marketers are enhancing their understanding of how data can fuel the delivery of meaningful interactions. This access to vast sources of critical information simply can't be gleaned manually.

MODERN MARKETING ESSENTIALS

2 Engagement

It's imperative to prioritize the delivery of the right content via the right medium at the right time, using an appropriate mix of activities such as PR, web, social media/blogging, events, and demand gen.

Advanced campaign automation provides marketers with the ability to strengthen your engagement with prospects from initial contact through sales and beyond. Key benefits of leveraging automation as part of your overall engagement strategy include the ability to:

Predefine rules and parameters for engagement:

- Mine the actions and behaviors that are conducive to the progression of the shopping journey.
- Communicate the right message at the right time across the purchase cycle.
- Delivery on the promise of relevance by supporting recommendations and offers to maintain loyal relationships.

Writing marketing rules with reporting

To effectively provide value-based content where and when your customers want to interact, you must develop tactics to address and align messaging across all digital channels. A content marketing strategy enables you to provide educational engagements by establishing your organization as a thought leader. Before you can find your "sweet spot" for content strategy, be sure to ask the right questions to understand how to deliver content:

- What are the primary attributes of our target consumer?
- How do our products and services assist in these specific attributes as they relate to the journey to purchase?
- Which offer delivery channels most appropriately suit our objectives? (i.e., social media, blog, etc.)
