Oracle Consulting Rapid Start for Oracle Business Intelligence Cloud Service

ORACLE®

CONSULTING

Gaining access to enterprise business intelligence just got easier with Oracle Business Intelligence Cloud Service (BICS) and Oracle Consulting Rapid Start for Oracle Business Intelligence Cloud Service which provides you the expertise and Oracle leading practices to bridge your business analytics requirements with BICS capabilities. This service provides a comprehensive application framework, implementation methodology and consulting services to help you efficiently and successfully deploy BICS faster, with less risk, and lower cost.

Getting more from your Analytics in the Cloud

This service is designed to accelerate your implementation by providing Oracle analytics experts with experience implementing BICS using a proven methodology and tools. Through a series of workshops, Oracle experts share the BICS architecture, data integration approaches, security configurations, and outline how the application can be configured to meet your business requirements. Special attention is paid to robust features such as advanced data visualization options and mobile user experience. Collaborating with your IT team and key business users, Oracle experts define an information presentation and data integration strategy based on Oracle leading practices which form the foundation for a prototype covering data loading, modeling, visualization, reporting and security provisioning.

Key deliverables:

- BICS discovery workshops covering architecture, data integration, information visualization, security configurations and application modeling

- Customer specific BICS data integration strategy based on leading practices and industry experience

- Customer specific information presentation and visualization recommendations for deploying powerful, intuitive dashboards in both the browser and on mobile devices

- BICS prototype with customer data and includes 2-3 key metrics, data loading, modeling, reporting and security provisioning

- Engagement Summary Report summarizing key findings, configuration settings, and recommendations for next steps

KEY FEATURES

- Rapid prototyping of BICS deployment based on your requirements
- Customer specific data integration strategy
- Special attention to advanced features such as data visualization and mobile user experience.
- Comprehensive application framework and implementation guidance

KEY BENEFITS

- Proven methodology for rapid application implementation
- Rapid time to value for your organization
- Reduced project cost and risk
- Predictable implementation cost as compared to traditional implementation methodologies
- Clarity on roadmap for future planning phases
- Mentor and expose your team to leading practices and methodology for BICS
