

# Oracle Prime Cloud Service

Oracle Prime is a cloud based enterprise solution that allows users to manage all aspects of project management and project pipeline prioritize through portfolio management. Some of the key features of Prime include real-time visibility in to project cost, schedule, risk and performance information, which allows project managers and stakeholders to make the right decisions. Prime provides tools for portfolio managers to evaluate multiple scenarios and arrive at an optimal plan to allocate financial budgets that are in-line with strategic goals. Cloud based risk analysis using risk registers and Monte Carlo simulation capabilities allow project managers and risk specialists to analyze potential impact on project. In-built enterprise social collaboration features allow project teams to communicate effectively in real time and manage project planning, monitoring, execution processes efficiently. Flexible and powerful dashboard and reporting capabilities allow stakeholders to have critical information at their fingertips.

**KEY BUSINESS BENEFITS**

- Unite project teams and stakeholders with a host of collaboration and feedback capabilities on the cloud
- Integrate scope, cost and schedule solutions under a single platform
- Integrated project portfolio and capital plan management
- Native, purpose- built mobile application provides users with a rich, targeted user interface and experience
- Leverage Oracle Prime’s easy interface and simple deployment which saves time, money, and reduces risk of change resistance
- Empower users with more autonomy and a greater contribution to value added work

## Project Management

Prime cloud service provides project manager with set of tools to effectively manage simple to complex projects under single platform. Prime capabilities allow organizations to manage various aspects of project.

List of features and capabilities that are available

- **Scope Management:** Allows project manager and schedulers to manage all aspects of project scope including planning, tracking and status(ing).

**KEY FEATURES**

- Context driven, light weight user interface
- Global search and navigation to major functional areas
- Built-in Workflows with an option to expand via configuration
- Web based interface with no client installation or plug-ins
- Review and approval of updates to ensure project integrity
- iPad and iPhone applications support to update project data
- Flexible dashboards, performance scorecards and reporting solutions
- Innovative user interface and personalized experience
