SOLUTIONS FROM ORACLE.

WHY ORACLE CONSULTING

- **Leading Expertise:** Oracle's own experts providing thought leadership for every Oracle solution.
- **Broad Coverage:** "End-to-end" lifecycle services across the entire Oracle product footprint.
- **Global Scale:** 13,000 Oracle experts in 145 countries, serving over 20 million users.
- **Unified Methodology:** Based on industry standards, high quality results across complex projects.
- **Flexible Delivery:** Onsite, offsite, and offshore, along with innovative solutions such as Rapid Starts and Expert Services.

Oracle's Primavera Consulting offers a full complement of experienced project management and technical resources committed to helping you get the most out of your Primavera products. We understand that determining the service needs of your organization can be overwhelming. That is why we help simplify the process with an Upgrade Value Assessment package. Five days in duration, an upgrade assessment is designed to help customers understand the overall impact of an upgrade. An assessment of existing hardware, software and an evaluation of new features of Primavera are included.

Primavera Consultants Provide Technical and Business Guidance

A structured assessment, as well as planning in advance of an upgrade, provides important input to support the eventual success of the upgrade. The Oracle Upgrade Assessment package leads your company through a set of well-designed and integrated discovery and evaluation processes to unlock additional value from your existing Primavera products. It provides your company with a well-defined approach to guide the upcoming upgrade project.

Most companies view upgrades as part of a regular "fitness plan" that provides continuous momentum and agility. Upgrades can also help organizations leverage enhanced product functionalities, lowering the cost and risk of expensive customizations. Embedded best practices and enhanced performance and scalability are additional advantages to upgrading to the latest release of software.

With more experience than anyone in the industry, and through close coordination with product development, Primavera Consulting is your best choice in planning and executing your upgrades. As your single source of accountability, Primavera Consulting has the greatest incentive to accelerate upgrade time-to-value.

How We Are Different?

The Primavera Consulting team is focused exclusively on Oracle Primavera applications and supporting technologies, and we have the experts that others turn to for leading practices in Oracle software implementations. We know Oracle best and can provide your business with tightly integrated, comprehensive, superior services throughout your ownership experience.

What is an Upgrade Assessment Package?

An Upgrade Assessment includes the following six step process:

- Document, Review and baseline the 'As Is' environment against its expected requirements. Make recommendations for how to address any issues found.
- Recommend the 'To Be/Post Upgrade' environment.
- Perform a Functional Impact Analysis and Recommendation.
- Perform a Technical Impact Analysis and Recommendation.
- Perform an Integrations Impact Analysis and Recommendation.
- Perform a customized Reports Impact Analysis and Recommendation.

Our seasoned consultants leverage Oracle's methods, tools and extensive experience with customer implementations across diverse industries and requirements. Tight integration across Consulting, Development, Support and Curriculum puts the entire Oracle team behind your success.

Solutions Made Easy

Oracle offers a variety of flexible implementation services. A comprehensive implementation program includes on-site consulting, software installation, custom workshops, manuals and reports, and a variety of coaching and educational programs. To learn more about upgrade assistance or the implementation program that is right for you, contact your local Oracle representative listed below.
