STORMSHIELD DATA CONNECTOR

BUILD DATA PROTECTION
INTO YOUR BUSINESS APPLICATIONS

BUILT-IN BUSINESS APPLICATION TOOL

.....

Advantages for users

- Fully seamless operation of the security solution

Advantages for the Security Administrator

- Solution adopted by users

Advantages for the System Administrator

- Easy integration of the solution
- Modular configuration of the security policy

Advantages for the CSO/CISO

- Quick return on investment through constant and seamless use of the solution

Advantages for third-party vendors

- Focus on the business core
-

A corporation's gold mine, information assets are relentlessly exposed to numerous occasions in which its sensitive data is lost or pilfered – malicious behavior from inside the company, the theft of workstations or terminals, data leaks due to the exploitation of a vulnerability, unauthorized access to a workstation or even the careless configuration of a security policy.

In an era where infrastructures have become outsourced, how do you guarantee the confidentiality of your business data when mobile coworkers have become part and parcel of everyday life? Is there any way to get protected from external interception and internal indiscretion?

PROTECT YOUR BUSINESS APPLICATIONS

Whether they are linked to the process, production or the sales model, your business applications are the foundation of your organization's value chain. The implementation of a solution to protect exchanged data, which is part of your sensitive assets, is an absolute necessity.

Stormshield Data Connector enables the addition of a security layer to your business applications and therefore the closely adapted protection of your assets. Your security policy will as such be fully integrated into your traffic while at the same time lowering the risks relating to the manipulation of sensitive data.

The automatic application of your security policy removes one more barrier from using a security solution. The process being completely **seamless**, end users will not be tempted to bypass the occasionally restrictive processes relating to the use of the security solution.

ABOUT

Stormshield, a fully-owned subsidiary of Airbus Defence and Space CyberSecurity, offers innovative end-to-end security solutions to protect networks (Stormshield Network Security), workstations (Stormshield Endpoint Security) and data (Stormshield Data Security).

A TRUSTED SOLUTION

Data encryption has been recognized as the answer to the restrictions relating to the security of sensitive data. Besides the automatic implementation of your security policy, Stormshield Data Connector provides a global response to your legal duties.

Based on a product - Stormshield Data Security - that has obtained a high level of certification, using Stormshield Data Connector guarantees trustworthy protection.

When you integrate this solution into your business applications, you will be adding this level of trust to your business traffic. Likewise, you can extend this guarantee by making the solutions in your security ecosystem work together.

Furthermore, since the Stormshield Data Connector solution is deployed in your organization's network, you maintain control over your confidential data as well as your encryption keys.
