

HandiSecurity

Control & Protect Valuable Client Data

Simplifies your client data ensuring your HandiSoft products are always up-to-date.

Key Features and Benefits

Under the Australian privacy legislation, businesses of all sizes are now responsible for the privacy and integrity of any client data that they hold.

Working in conjunction with the existing HandiSoft modules already used in your practice, HandiSecurity gives you complete control over access to your data, with facilities that are easy to set up and administer.

HandiSecurity comprises two Practice Manager components: Security Manager and Download Manager.

About Sage HandiSoft:

More than 7,500 Australian accountants and taxation agents trust Sage HandiSoft's leading practice management, client accounting and taxation software. Sage HandiSoft's integrated suite and central client database is reliable, easy to use and highly effective for sole practitioners through to larger firms with 70+ staff. Sage HandiSoft is a wholly owned subsidiary of the listed global Sage Group plc which has over 6 million customers and more than 12,600

Security Manager

Complete Control

By defining groups of users for your practice, you can specify who can perform which operations in each module installed anywhere on your network. What's more, you can even specify the level of access that each user group has to specific clients.

For example, you may decide that only partners have permission to delete clients from your database, or that only partners may view their own returns.

Complete Visibility

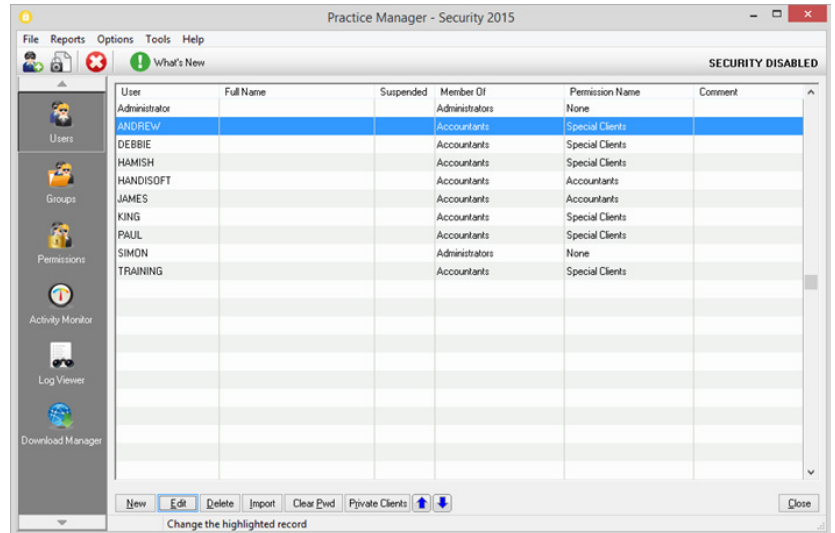

HandiSecurity also gives you the option of creating audit trail reports of all changes made to your HandiSoft data. If you require maximum visibility, this is the tool you need.

Download Manager

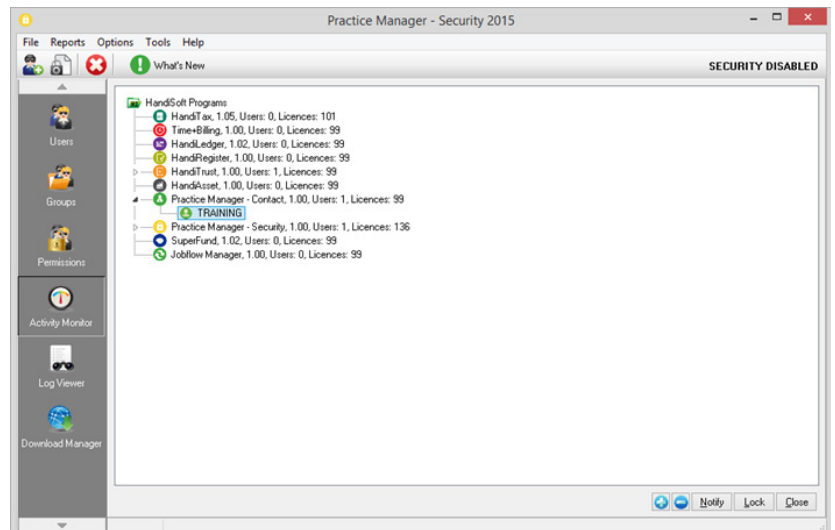

HandiSecurity's Download Manager makes it easier than ever to keep all of your HandiSoft modules up-to-date. It operates over your existing Internet connection, interrogating our server to compare the most current versions against the versions installed on your network and does this without sending any information about your system to us.

A single mouse click displays detailed information about any new versions that are available for installation, making it easy to download them all, saving them to a common disk directory for installation at a convenient time.

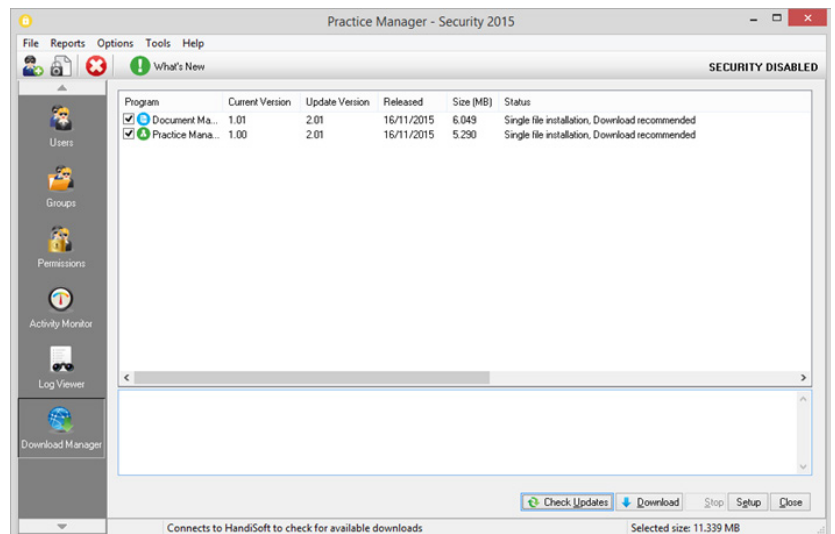

Important Note:
To be effective, you will need a HandiSecurity licence for each computer running HandiSoft.
