

# Streamline your product development processes by integrating Sage X3 and Audros PLM

## A global solution for discrete manufacturing firms

Your customers are becoming more demanding and competition is becoming ever more global.

In order to remain competitive, you need total control of your processes for developing new products, from initial design to final production. Objectives: shorten delivery lead times, improve the quality of your products and services, and encourage innovation.

To help you meet these challenges, Sage and Audros have created a partnership to offer a global solution combining the Audros Product Life Cycle management (PLM)\* suite with Sage X3.

This combination will help to make your company more flexible across the entire value chain: from the design of new products to market launch.

This solution will help you increase productivity across your organisation, develop your corporate culture, and your vision for the future of your business.

### A new integrated offer

By combining Audros PLM suite and Sage X3, you benefit from a global view, all the way from engineering to manufacturing. This solution creates an automatic link between your data, your design documents, and your ERP.

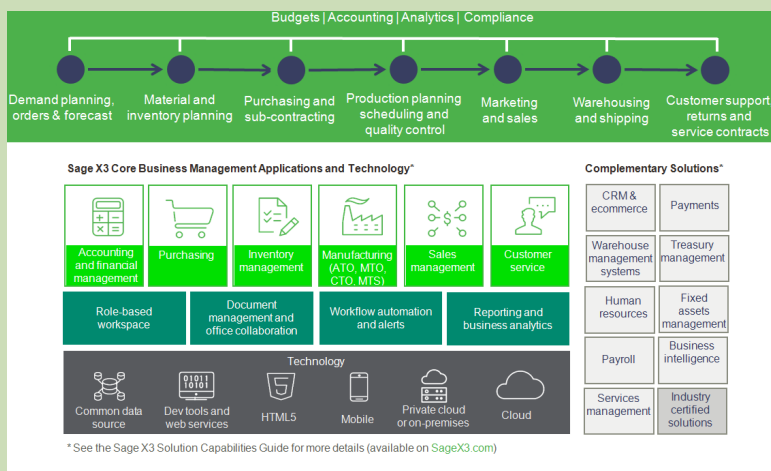

You save precious time and avoid costly errors by ensuring the consistency and individuality of your design and production data.

### Take the lead

The integration of the Audros PLM suite with Sage X3 will shorten your delivery lead times and the time-to-market for your new products, improve product quality, and increase customer satisfaction.

All departments share the same information at the same time, making the most of shared knowledge.

EDM-PLM solution for Sage X3

## Key features

Specifically designed for the discrete manufacturing industries, the Audros PLM solution for Sage X3 meets the needs of designers and/or manufacturers of catalog products, customized products or business accounts.

- **Automatic integration of the main CAD assembly structure in the market** (AutoCAD, CATIA v5, CREO, INVENTOR, ME10, SOLIDEDGE, SOLIDWORKS, TOPSOLID)

- **Display the business views of your BOM**

Audros permits the BOM management as designed, as manufactured, as maintained, coming from both from your CAD as from your ERP.

- **Creating non-graphical items**

Audros is used to complete a BOM with items that are not from CAD like grease, paint, glue ... This data is also synchronized with Sage X3 data so as to manage data suppliers.

- **Comparing a structure and/or a BOM**

Displays the differences and similarities on the quantities, versions, levels ...

- **Change Management with validation**

(ECR\*/ECO\*/ECN\*)

It is associated with all types of workflow as well as on the data from the PLM as from Sage X3 to manage and track changes.

- **Access Audros screens from Sage X3**

The integration of Audros provides direct access to industrial documents (drawings, 3D parts and assemblies, ranges, technical sheets ...), to commercial folders (specifications, quotes), to Quality documents (manuals, procedures, standards,) etc.

- **Managing accounts**

Access to the Audros project management module allows you to manage deliverables from the tasks and milestones accessible from Sage X3 and from an integrated GANTT.

\*ECR : Engineering Change Request

\*ECO : Engineering Change Order

\*ECN: Engineering Change Notification

## Two experts to assist your business

Sage and Audros, recognised software editors in their respective fields, are committed to offering innovative solutions for today's ever-changing markets.

The solutions they develop are a product of day to day dealings with leading industry firms.

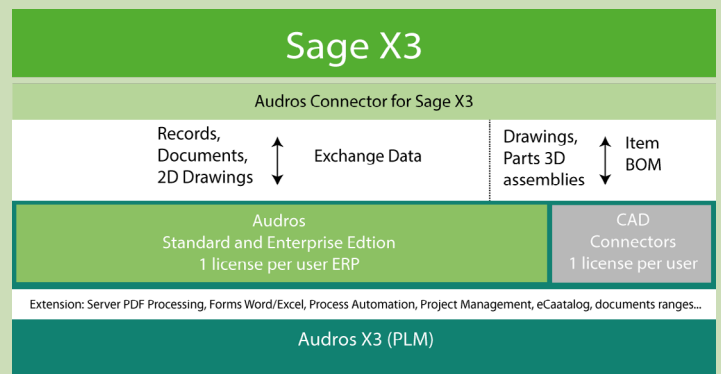

The Sage Group plc is a leading global provider of business management software to small and medium sized companies, creating greater freedom for them to succeed. Sage understands how and why each business is unique. We provide products and services that suit varying needs, are a pleasure to use and are secure and efficient. Sage has over 6 million customers and more than 13,500 employees in 24 countries covering the UK & Ireland, mainland Europe, North America, South Africa, Australia, Asia and Brazil.

Since 1993, Audros Technology has developed the EDM/PLM Audros solution for SMEs from 50 to 2000 employees as well as subsidiaries of larger companies.

Audros solutions are used both in France and abroad (China, Germany, Italy, Switzerland, Tunisia, USA...) by more than 180 customers and 15,000 users.
