

Experience enhancements that count. Upgrade today!

Sage Estimating (SQL) continues the tradition of helping construction firms gain a competitive advantage with faster, more accurate estimates that help you land more jobs at higher profitability. If you haven't upgraded your estimating software, your company is missing out on powerful, customer-requested features and enhancements that help you better safeguard estimate data, increase estimating efficiency, and personalize your reports.

For a complete list of enhancements by version or to renew your service plan, contact your Sage representative at **866-991-5610**.

Put your best bid forward.

14.1/13.1

Enhanced estimate and role-based security features—Sage Estimating (SQL) 2013 expands your control over access to your estimating data:

- **Database Editor** provides an easy-to-use method for setting up and maintaining your estimating databases.
- **Compatibility and support**—Runs on both Microsoft Windows 8® and Microsoft Server 12®.
- **Manage shared report and spreadsheet formats**—Easily set rules to determine who has the ability to create, edit, and delete publically shared custom spreadsheet and report formats.
- **Security roles apply across the system**—Changes to security roles are automatically applied to all SQL databases, saving you time and ensuring data consistency and accuracy.
- **Manage and share custom reports**—Administrators can add and manage custom SAP® Crystal Reports for Sage Estimating through the Estimating Management Console. Users can run the custom reports from their report drop-down menu—a convenient, “one-stop” location for all your reporting needs.

If you're currently on an active Sage Business Care plan for your estimating software, you will receive access to this upgrade automatically. If you have questions and are interested in learning more, contact your authorized Sage business partner or your customer account manager at **800-858-7095**.

11.2

Features improved integration and enhanced flexibility. Sage Estimating (SQL) brings a number of key updates, enhancements, and parity features including:

- **OnScreen Takeoff integration**—You can now generate estimates in Sage Estimating from drawings and projects created in OnCenter's OnScreen Takeoff (OST). Using the OST Integrator, you can match OST items and conditions with Sage Estimating items and assemblies. Dimensions are calculated from electronic plans, making the takeoff process much more efficient.
- **Item attachments**—A great reference tool, built-in documentation provides instant access to important item-related details. Attach a file (PDF, text, image, and more) or hyperlink to a database or estimate item using a number of methods. All attachments are easily viewed from the spreadsheet.
- **Rich text format in notes**—Sage Estimating notes now support rich text formatting options. Use bold text, colors, and various system fonts to emphasize certain areas and ensure important information stands out from the rest.
- **Export formulas to Excel**—When exporting the Spreadsheet report, the process now includes the formulas used to calculate the spreadsheet values. This feature offers a simple method for clearly understanding, viewing, and modifying calculation methods using Microsoft Excel®.

11.1

The “next generation” of Sage Estimating (SQL)—Take advantage of the power and performance of SQL with these new features and enhancements:

- **SQL Server database**—A Microsoft SQL Server®, database platform offers the security, performance, and flexibility needed to more efficiently manage data. Estimates, items, and assemblies are stored in a single database, making data backup and maintenance a snap.
- **Intuitive interface**—Sage Estimating takes advantage of “ribbon” controls, offering an intuitive work workflow and easy navigation.
- **Spreadsheet undo**—This command is used to reverse the most recent editing action performed on the estimating spreadsheet.
- **Enhanced integration with Job Cost**—A Job Cost Transfer Wizard now steps you through instructions for transferring your budget transactions to Job Cost.

Renew your service plan and upgrade to the version of Sage Estimating that makes the most sense for your company. Call **866-991-5610** to upgrade today.
