

Sage 300 for Healthcare

sage

Sage 300 for Healthcare

Adopt a faster, simpler, more flexible solution with full business management capabilities. With Sage, you are choosing the next generation of business management solutions for your Hospital or Clinic to cope with ever-changing demands of business today. Sage will help you stay agile and meet whatever comes your way.

The challenges facing the healthcare industry in the 21st century range from global pandemics to new and emerging public health threats. This industry is under constant pressure to respond to an evolving environment whilst adhering to an increasing number of healthcare standards and regulations. In order to succeed under these conditions, it is imperative for organisations in the healthcare sector to utilise fully integrated healthcare systems that automate the flow of information across the organisation.

From the patient appointment through to the final discharge, every interaction, process and procedure needs to be managed in a paperless environment, at the same time interfacing directly to a vast array of medical equipment. Sage Solution for Healthcare provides organisations with the best technical architecture and applications. It offers robust security and tight integration across departments including accounting and finance, providing stakeholders with the correct records and reports on demand.

Running your business does not have to be complicated

Get more done, faster.

Increase user productivity and accelerate adoption with an intuitive user interface that is workflowed, thereby driving efficiency and eliminating administrative overheads.

Go where your business takes you.

Access your data wherever you are - check your patient records, manage appointments, approve purchases and view key performance indicators, all on the go, on a mobile device.

Take back control over your processes.

Eliminate inefficiencies, ensure compliance and streamline operations with end-to-end integration of your business processes to control costs and improve profits and controls.

Get the insight you need, when you need it.

Evaluate risks and monitor performance in real-time with user dashboards, self-service business intelligence and reporting tools, delivered on premise, on a mobile or in the cloud.

Gain agility and focus on your business.

Take advantage of enterprise-class business management functionality, security and scalability at a fraction of the cost and complexity of typical business management solutions. Simplify IT management and free up resources to focus on more important projects. Embrace the power of Sage to easily manage unpredictable new requirements and manage change whilst delivering the desired level of transparency and accountability.

One system, anywhere at anytime.

Reduce costs by implementing a single system for your Healthcare needs. Replace legacy systems that inhibit performance through duplicate processing, weak integrations and an over-reliance on spreadsheets to make decisions.

Integration made easy.

Over time, many Healthcare organizations have invested heavily in specific best-of-breed software solutions that are still required or are needed as part of the transition phase to a new business management solution. Sage delivers many integration possibilities. Interfaces that may be required include connectors to consolidation tools or existing systems or medical devices to manage other line of business needs.

Key features that drive the success in this environment

A complete solution for the Healthcare Industry – helping keep your focus on your patients. The Sage solution for Healthcare is multilingual, multi-currency and multi-clinic/hospital. It provides healthcare clients with the freedom to choose the functionality they require across an array of modules. The integrated financial modules allow for detailed operational management with reporting such as provider/department-wise Trial Balances, Profit & Loss Statements, Asset Management, Procurement and Material Forecasting and more. Patient appointments can be scheduled and changed - patients can be admitted, transferred and discharged with full visibility of available beds and resources at each location. All services provided during a patient's visit or stay in the clinic or hospital are captured and prescriptions can be given online. Tight inter-department integration enables accurate and complete In-Patient and Out-Patient Billing with interfaces to Insurance (Medical Aid) providers.

Transparency, compliance and service delivery all made easy

There is an absolute need to review systems now. It is widely regarded as a difficult and challenging environment for healthcare organizations. Both external and internal expectations for transparency and process improvement are at an all-time high and exacting service delivery has never been more necessary. These pressures lead to potential inefficiencies at a time when budgets are unlikely to grow considerably so costs must be better managed. Now is the time to review the technologies available to take back control and deliver an exceptional experience both to staff and stakeholder.

Sage is built to deliver both front and back office operations, running on your computer or via a mobile device. Sage can scale to hundreds of users and seamlessly integrate to external systems and equipment. Sage is the natural choice to deliver a prescribed healthcare solution, using pre-defined business rules and processes together with an exceptional user experience that leads the market.

About Sage
