

Analysis • Anywhere • Anytime

eQura for Sage Evolution

eQura for Sage Evolution is a pre-built reporting and analysis solution with highly interactive dashboards, providing users with advanced analytics and insight into various areas of the business at anytime from anywhere.

Mobility is one of our primary focus areas as we identified the need to address the demand for mobility in businesses both locally and globally. Through speed, accuracy and agility, it allows users to make faster business decisions from operational level through to managerial level.

eQura has a simple and easy to use interface that is designed to identify areas of strength and areas that need improvement within the business. It provides fast insight and a better understanding of the business and how it operates in a single view.

eQura, as a standard, covers the core aspects of Sage Evolution, but not limited to General Ledger, Accounts Receivable, Accounts Payable and Inventory. Additional add-on development, based on customer specific needs can also be facilitated.

eQura Modules

Overview

Monitor historical, current and predictive business trends through an intuitive dashboard allowing business leaders to understand how the company performs and conducts business.

General Ledger

Income Statement, Balance Sheet and DuPont Analysis, including key performance indicators and financial ratios, in order to determine your company's health and stability.

Accounts Receivable

Analysis on customer sales related activities from an overall perspective to a more detailed and in-depth view on a customer group or individual customer basis.

Accounts Payable

An in-depth analysis on purchases from suppliers allows for better insight into the company's purchasing behaviour and assists with building productive supply chain relationships.

Inventory Sales

In-depth sales analysis assists with marketing strategies and helps identify relationships that exist between inventory items as well as opportunities for up-selling and cross-selling.

Analysis • Anywhere • Anytime

Custom

Keeping in mind that every industry and business is different, eQura can be customised to cater for your Sage Evolution specific analytics and managerial requirements.
